Largest Vector Control District in Los Angeles Now on Facebook and Twitter

**Los Angeles, CA**— The Greater Los Angeles County Vector Control District (GLACVCD) can now be found on Facebook and Twitter.

GLACVCD is pleased to announce that it is now part of the social media movement. “We serve millions of constituents in our District, so we’re always looking for ways to enhance our communication with the public,” says Director of Community Affairs Truc Dever. GLACVCD serves approximately six million residents living within its 1,330 square mile territory. The District currently shares information through its website, emails and newsletters as well as at community fairs and presentations. “We’re excited to join the social media network and to take advantage of the new, powerful digital tools available for disseminating our important public health messages,” Dever continues. The addition of social media will allow for the District to better inform and connect with the public about the latest vector concerns and issues.

Look for upcoming tweets and status updates with the latest West Nile virus information, prevention tips, and other important mosquito and vector control messages. Visit GLACVCD online at [www.glacvcd.org](http://www.glacvcd.org) and click on the Twitter and Facebook icons to sign up and start receiving valuable vector control news. Are you already on Twitter and Facebook? Search for ‘GLACVCD’ on Twitter to become a follower, and type in ‘Greater Los Angeles County Vector Control District’ on Facebook to become a fan.

For more information, please contact Public Information Officer Crystal Brown at the Greater Los Angeles County Vector Control District by calling (562) 944-9656 x511.
