## 11. STAFF PROGRAM REPORTS: APRIL 2009

### 11.1 Manager's Report

K. Bayless, General Manager

Ken Bayless reported that Operations Director Mark Daniel has completed and filed the NPDES permit. Ken also reported that District staff will be meeting with local legislators during the MVCAC-designated Legislative Day at the District for May 29<sup>th</sup>. Appointments are being scheduled at local district offices to discuss some of the current issues related to budget and pesticide regulations. Districts statewide will be asking for an exemption from the Governor's possible suspension of Prop 1A (2004). Ken encouraged any Trustees who are available that day or who may have connections in Sacramento to assist with the efforts.

Trustee Wassem requested clarification about the NPDES permit and how it impacted the application of adulticides. Ken clarified that although the permit does not cover adulticides, the District can still use adulticides if necessary, pending a final decision from the 6<sup>th</sup> Circuit Court. Trustee Wassem asked about the prevalence of adulticiding procedures in the district operations. Ken answered that the District has not conducted any aerial adulticiding and the majority of chemical control is carried out through larviciding.

### 11.2 Operations: (Staff Report A)

M. Daniel, Operations Director

Mark Daniel referred the Board of Trustees to Staff Report A for a correction. He stated that the cost of the chemical Vectorex WDG used for Underground Mosquito Control for the month of April was \$2,784.60. Mark also reported that service requests last month totaled 500. Some factors contributing to this increase in requests were the April press releases and an unusual crane fly bloom this year. About 20% of the 500 service requests submitted were for crane flies.

### 11.3 Scientific- Technical: (Staff Report B)

P. O'Connor, Vector Ecologist

Paul O'Connor gave the Scientific-Technical Services report for Director Susanne Klueh, who had a family emergency in Germany. Paul stated that in April, the District detected its first indications of West Nile virus activity, first in a WNV positive dead crow in Valencia and then in a positive mosquito pool in Carson. The disease risk assessment model for the District currently stands at 2.6 response level, which is emergency planning mode. The department is currently assisting Operations in planning and assessing where to conduct additional mosquito control and treatment.

### 11.4 Community Affairs: (Staff Report C)

T. Dever, Community Affairs Dir.

Truc Dever reported that the department is working to increase the District's visibility and raise awareness about the importance of district services, in light of the state's financial situation and the Governor's potential suspension of Prop 1A. Department staff has been meeting to coordinate summer projects, awareness campaigns, and find ways to integrate new hands-on learning technologies into the education curriculum.

Trustee Archeleta noted that at last week's Contract Cities conference in Indian Wells, the local vector control district had a display promoting district services.

Trustee Williams thanked Truc Dever for an informative presentation on recent WNV activity at the Carson City Council meeting.

Trustee Figueroa used this time to thank the Trustees for allowing her the opportunity to attend the AMCA annual conference in New Orleans. She picked up several collateral items for review and possible integration by the District, including a calendar and book.
