ATTENTION: LOCAL LAW ENFORCEMENT AGENCIES, ALL LOS ANGELES CITY & COUNTY DEPARTMENTS, EMERGENCY RESPONSE UNITS

Re: Battery-Operated Mosquito Traps

The Greater Los Angeles County Vector Control District would like to remind local agencies that our routine mosquito trapping season resumes in early spring and continues through October. In some selected areas, trapping will be conducted year-round. District staff will be placing two types of battery-operated mosquito traps (Figures 1-4) at locations within District boundaries.

Please be advised that some residents unfamiliar with these mosquito traps may call in “suspicious objects” to local law enforcement. There have been past incidences which have triggered responses from the LAPD and the LASD Bomb Squad. This has inconvenienced local law enforcement, business owners, and residents.

The District Management Staff is recommending that this notice be posted electronically and distributed to all of your respective stations and units throughout the County. Thank you for your cooperation.
